SupraProductive WOW Epoxy Primer

(PercoTop® CS389)

Industry-leading corrosion and humidity resistance. This wet-on-wet primer delivers a fast cure and can be applied with all common spray equipment to help save time and improve performance.

APPLICATION

Easily apply with all common spray equipment (airless, airmix and standard spray guns). Compared to a standard epoxy, you get both faster curing time and reduced baking cycle time (wet-on-wet application). SupraProductive WOW Epoxy Primer can be applied directly over various metals (including aluminum and galvanized steel) on clean, sanded or shotblasted substrates.

KEY FEATURES

- Best-in-class combined market offering:**
- Superior corrosion and humidity resistance
 - Wet-on-wet process eliminates need for primer bake
 - Cures fast for assemble right after topcoat baking
 - High filling power on rough substrates
