The Perfect Blend of Protection & Efficiency

SupraSand High Build Epoxy Primer
PercoTop® CS388

AXALTA COATING SYSTEMS

SupraSand High Build Epoxy Primer (CS388)

The perfect blend of super corrosion resistance and sandability. This top-performing primer applies directly to metal surfaces with no need for filler, surfacer or e-coat.

APPLICATION

Easily applied with all common spray equipment (airless, airmix and standard spray guns). Compared to a standard Epoxy, you get both faster curing time and reduced baking time.

KEY FEATURES

Best-in-class combined market offering:

- High build delivers superior corrosion protection performance
- Higher sandability results after standard drying
